## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Frykhult (US 5296143). Frykhult '143 discloses a fig. 9-11 embodiment [col. 6, lines 26+] of a horizontally mounted filter disc 44 having a rotor 45. A detachment device (56 and 58) is disclosed which includes a first plurality of nozzles 56 and a second plurality of nozzles 58, both located above the rotor axis. Both nozzles can spray either high pressure gas or high pressure liquid [7, 15+]. As such, the combinations of gas nozzles and liquid nozzles as recited in the claims is readily obtained with the coarse fraction being discharged at 43 and the fine fraction being discharged at 48,49 [6, 40+]. The "adapted to" language of claims 4 and 5, for example, merely means the nozzles are capable of being adjusted. Such nozzles, if properly equipped with valves, would be capable of such adjustments. A

positive recitation in “means plus function” format would carry more weight than the above “adapted to” language.
